Foreword from Circuit Chairman

It gives me great pleasure to present this Catalogue of 12th Photolovers International Photography Circuit, 2019.

We are most grateful to all the participants, institutions, jury members and all members of the three participating clubs for their help and support.

Imaging equipment and editing technology has changed very rapidly over the past decade. In the past, only a select few would take interest in photography, as the equipment and management required substantial technical knowledge.

Now, photography has become far more user-friendly and affordable. Nearly anyone with a camera can explore photography as a medium, and this field is no longer limited to select few professionals now!

Addition of smart phones has begun to rival professional cameras in terms of quality. Individuals with a smart phone are easily capturing stunning images, editing them and posting online on the social media.

Each year witnesses some new trends in photography. The future of photography is bright, and the photography industry is doing fairly well due to the influx of digital technologies.

From black and white to sepia, the clarity of modern photography has pushed people back towards classic photos, and the depth and values behind them.

With the increase in tourism, world over, artists are now showcasing their excellent travel photographs and capturing the timeless stills of the place, Photography has become a very important tool while travelling for one and all.

The coming years will see more creativity and experimentation also in Photographic art, availability of new technology and a wide range of equipment will enable more such experimentation.

The future editions of Photolovers Circuits will see more artistic works, the value, meaning, and emotions in photographs will further gain emphasis in artistic form of Photography. Many thanks, very Happy Clicking and see you in our next edition!

Sudhir Saxena,
ARPS, EFIAP/b
Circuit Chairman

Acknowledgement
