Sudhir Suresh
ARPS, EFIAP
Circuit Chairman

Somehow the main CPID sections of this Circuit could not be published in the PSA journal, though the application was submitted in time and the sections were recognized by PSA. We are extremely grateful to the participants that they supported us by sending their entries in large nos. on our direct intimation.

Thanks to all of you for your continued support to Photolovers Circuit, we are extremely grateful to each one of you.

Wide range of photographs is received every year but new works are seen with great admiration by the Judges, they always look for images not seen by them earlier. Technical perfection remaining a pre requisite, excellent, innovative and tasteful photography is always appreciated.

Some entrants love the picture borders more than their photographs and make lot of efforts in creating very bold and wide borders, most of the time, killing the original images. Please rest assured that the jury will definitely notice it and in all probabilities, your image will be at a

disadvantage by such border creativity! We want to see your excellence in creating the main photographic image, not the border. Many otherwise very good images have to suffer due to such bold, awkward borders. We are not in any way discouraging you to create beautiful and creative borders but please see that such treatment is enhancing your image and not spoiling it.

A word of advice for new workers, particularly in the Nature and Wild Life sections and to some extent in Photo travel section, please consult some senior workers before sending your images. Human presence and presence of many man made things make the Nature photographs ineligible. Please read the PSA and FIAP Nature, Wild Life and also Photo Travel section definitions carefully, taking little guidance from your senior friends will clear all your doubts and your success rate will increase to a great extent. The jury feels bad in rejecting your very good pictures when they do not confirm to the definitions strictly.

Your feedback is always very helpful in improving the Circuit; please do let us know your views.

Happy Photography and a very Happy New Year!
